

Newsletter No. 3

This is the third issue of the FucoSan project newsletter. FucoSan is a three-year German-Danish project funded by the Interreg Deutschland-Danmark Programme. This newsletter will be issued six times during the funding period to keep you up-to-date with the latest project news and information.

The Evolution of Ecosystems for Converging Technologies

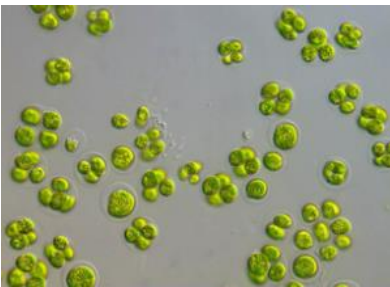

What are the key actors when it comes to bringing new technologies and solutions out of the lab to be deployed?

FucoSan project partner Daniel Laufs set out his approach to answer these questions at the International Conference on Engineering 2018.

Microalgae for feed, food and other uses

Research is still on the trail of the various applications of microalgae: Professor Søren Laurentius Nielsen from Roskilde University in Denmark was invited by the FucoSan partners to Kiel to present his research results on the production and use of microalgae biomass. In a recently completed project, Professor Nielsen has worked on improving and industrialising the production of live fish feed based on small crustaceans.

Business game at SDU Sønderborg with students

At the SDU Sønderborg, Engineering students took part in a business game, organised by Ferran Giones, Assistant Professor for Technology Entrepreneurship. In the role of a new project manager of FucoSan the students had to search for existing patents with fucoidans and to map an innovation ecosystem around the FucoSan technologies and their diverse applications.

Algae – more than just a plant from the sea

Thinking about algae – what springs to mind? A vague memory of the latest Baltic Sea vacation or the last time you visited a sushi restaurant, which is way too long ago? The widespread sea plant has more to offer than most people know.

Young scientists exchanging experiences

In order to effectively achieve the common goal of a successful fucoïdan characterisation, the PhD students of the German project partners met in Kiel.

The young scientists exchanged experiences, discussed scientific problems and coordinated their further activities. The first meeting is being followed by a regular exchange every two months.

FucoSan on Tour

13/11/2018: Enterprise Europe Network IB.SH in Kiel, Germany

9-11/10/2018: Week of Health and INNovation in Odense, Denmark

22-24/08/2018: Blue Biotechnology in Baltic Sea Region in Greifswald, Germany

Project Facts

- 8 partner organisations
- 8 network partners
- Duration: Mar 2017 – Feb 2020
- Budget: 3.8 m Euro, thereof 2.2 m Euro funding
- Lead partner: University Medical Centre Schleswig-Holstein, Campus Kiel
- Supported by the European Regional Development Fund
